F.SET.DWS-UV		DWS-UV	3 (+ 1 lamp)
F.SET.SS-1.0		SS-1.0 inline	1

REVERSE OSMOSIS SYSTEMS - FILTER AND MEMBRANE REPLACEMENT SETS

Item # Count		In Use with System - Model #	Filters + Membrane
F.SET.RO3		RO3	2 + 1
F.SET.RO3-UV		RO3-UV	2 + 1 (+ 1 lamp)
F.SET.RO4		RO4	3 + 1
F.SET.RO4-UV		RO4-UV	3 + 1 (+ 1 lamp)

FILTER LIFE: REPLACE ONCE A YEAR*

Filters are designed with capacities and under normal circumstances should last up to one year before replacement is needed*.

*Filter service life is based on local water conditions and your usage and should be replaced annually or as needed and not to exceed one year. Fine sediment, micro-plastics or certain water conditions may prematurely reduce flow rate and service life due to the filters' ability to capture and absorb contaminants. Replace as needed, based on these conditions we cannot control, not to exceed a year.
